**Subject:** public media in Switzerland should be saved

L.S.,

It is a shame so many people do not understand that independent, trustworthy news is a pillar of democracy and local culture can only survive by unbiased local public media. No matter the outcome, public media in Switzerland should be saved, but rather it is made clear that the whole idea behind the no-billag referendum is wrong.

I sincerely hope that de Billag survives and the media companies, with the support of the most people, can continue their work.

Sincerely  
Egon Verharen
